

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated ▾

Ticket comments
An employee compromised their workstation by executing a known malicious, password-protected attachment (bfsvc.exe) received via a phishing email. The email contained obvious red flags, including poor grammar and glaring discrepancies between the sender address (76tguy6hh6tgftrt7tg.su), display name, and signature. Given the confirmed execution of the malware and the alert's medium severity, this ticket has been escalated to a Level 2 SOC Analyst.

Additional information
